Cresskill, NJ 07626

Dear Richard:

As you already know, foot, ankle and knee injuries are the most common injuries that athletic trainers deal with amongst professional athletes. While no amount of technology will ever allow for total injury prevention, it does allow for a more rapid recovery thus a speedier return to the playing field. Being an NFL trainer for 28 years, I am always searching for alternative methods to aid in player recuperation.

With this in mind let me say that we are pleased with your products, especially the shoulder wrap, leg and ankle wrap and elastic bandage utilizing Pain Checker™ technology. I have used these products while serving as Head Athletic Trainer with the New York Jets, and look forward to continued use of these products as an adjunctive treatment during rehab and off the field with my Kansas City Chiefs players.

I know Pain Checker Health Wear is developing additional sports medicine products and I look forward to introducing them into the training room as well.

Richard, I want to wish you and your company great success as you take this technology to the marketplace. I can see these products being used far beyond the football field.

Sincerely,

David W. Price
Head Athletic Trainer
